Relab - Web Developer Test

The aim will be to test you on the fundamental skills that are required for web development. The task is to write a basic web page with a small amount of scripting.

The page design can be found here:
https://www.figma.com/file/P8ktK0Oo9onrKtQLRBIrVI/Refer-a-friend-mock-up?node-id=0%3A1

Web Page Requirements

- The page must be to the provided design (layout, fonts, colours and images)
- Upon page load the user can see a unique code
- An on-click action that will copy the unique code to the users clipboard

You can use

- HTML
- CSS, Bootstrap
- JavaScript (including JavaScript libraries like JQuery)
- Online code resources like stack overflow

You will be assessed on

- Ability to write clean & maintenable code
- Problem solving ability

Your test submission will be

1. A Git repository link

- You can share with us one that you have created
- Please include this pdf in your repo

Once you have completed this task, send an email with your name and a repository link to leon@relab.co.nz with cc to brendan@relab.co.nz once finished for assessment.
